STROKE PROGRAM QAULTY & OUTCOMES

t-PA Within 60 Minutes

tPA within 60 minutes is the percentage of ischemic stroke patients receiving tPA, the “clot busting” drug, in the emergency room who have a time of arrival to initiation of tPA of 60 minutes or less

Benchmark: American Stroke Association, Get With The Guidelines

(Date : 2020)

*Lower is Better =
Quicker treatment
times!!*

(2020)

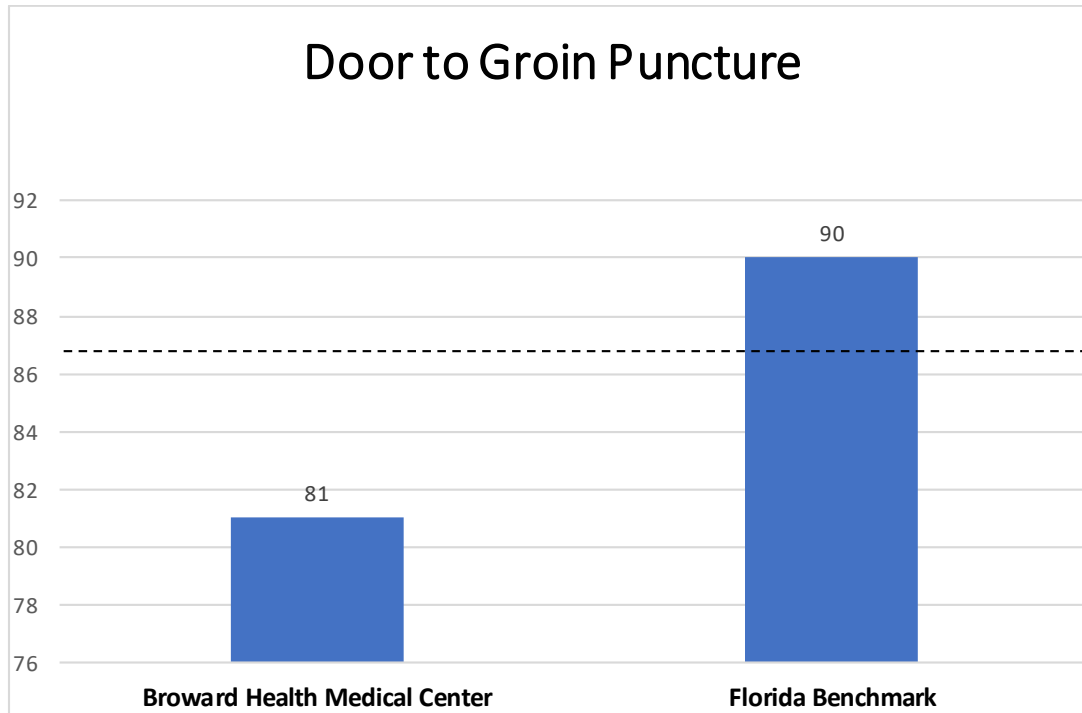

STROKE PROGRAM QAULTY & OUTCOMES

Median time to treatment with tPA

This is the median time (in minutes) of arrival at the emergency department to time tPA, the “clot busting” drug is given

Benchmark: American Stroke Association, Get With The Guidelines

(Date : 2020)

STROKE PROGRAM QUALITY & OUTCOMES

Door to Groin Puncture < 90 Minutes

Average time it takes from arrival of patient with acute ischemic stroke to surgeon getting access to the artery for clot retrieval

Benchmark: American Stroke Association, Get With The Guidelines
